Media view page (2.1)

Page notes

Elements for consideration for phase 2 (not shown in this wireframe):

- 1) Add to favourites
- 2) Watermark (eg. site logo)
- 3) Favourited (how many times this item has been)

Elements that require Sign in

- 1) The 'Add to favourites' link (phase 2 item) only renders if the user is logged in.
- 2) If a user is not logged in and tries to vote ('Yes, I'm smiling'), the Sign in options render (which also includes a link to the registration page).
- 3) If a user who is not logged on tries to comment the Sign in options render (which also includes a link to the registration page).

A user can only vote on a specific media item once

A user can only vote on a piece of media once, and so in this case the image and labelling of the vote area will need a different treatment. So if the registered user has already voted for this item the labelling will not be hyperlinked and should read "You have already voted" (or similar).

Page notes

Edit process

- 1) User edits the data held in the form fields and selects 'Save edits'.
- 2) User is redirected back to the top of the page where a message is rendered worded the same or similar to the following:

" Your account details have been successfully updated"

Form field validation

Form fields should be validated both inline at the time of entry as well as on form submission. Validation error messages should render adjacent to relevant form fields.
